

OVER  
**50**  
YEARS

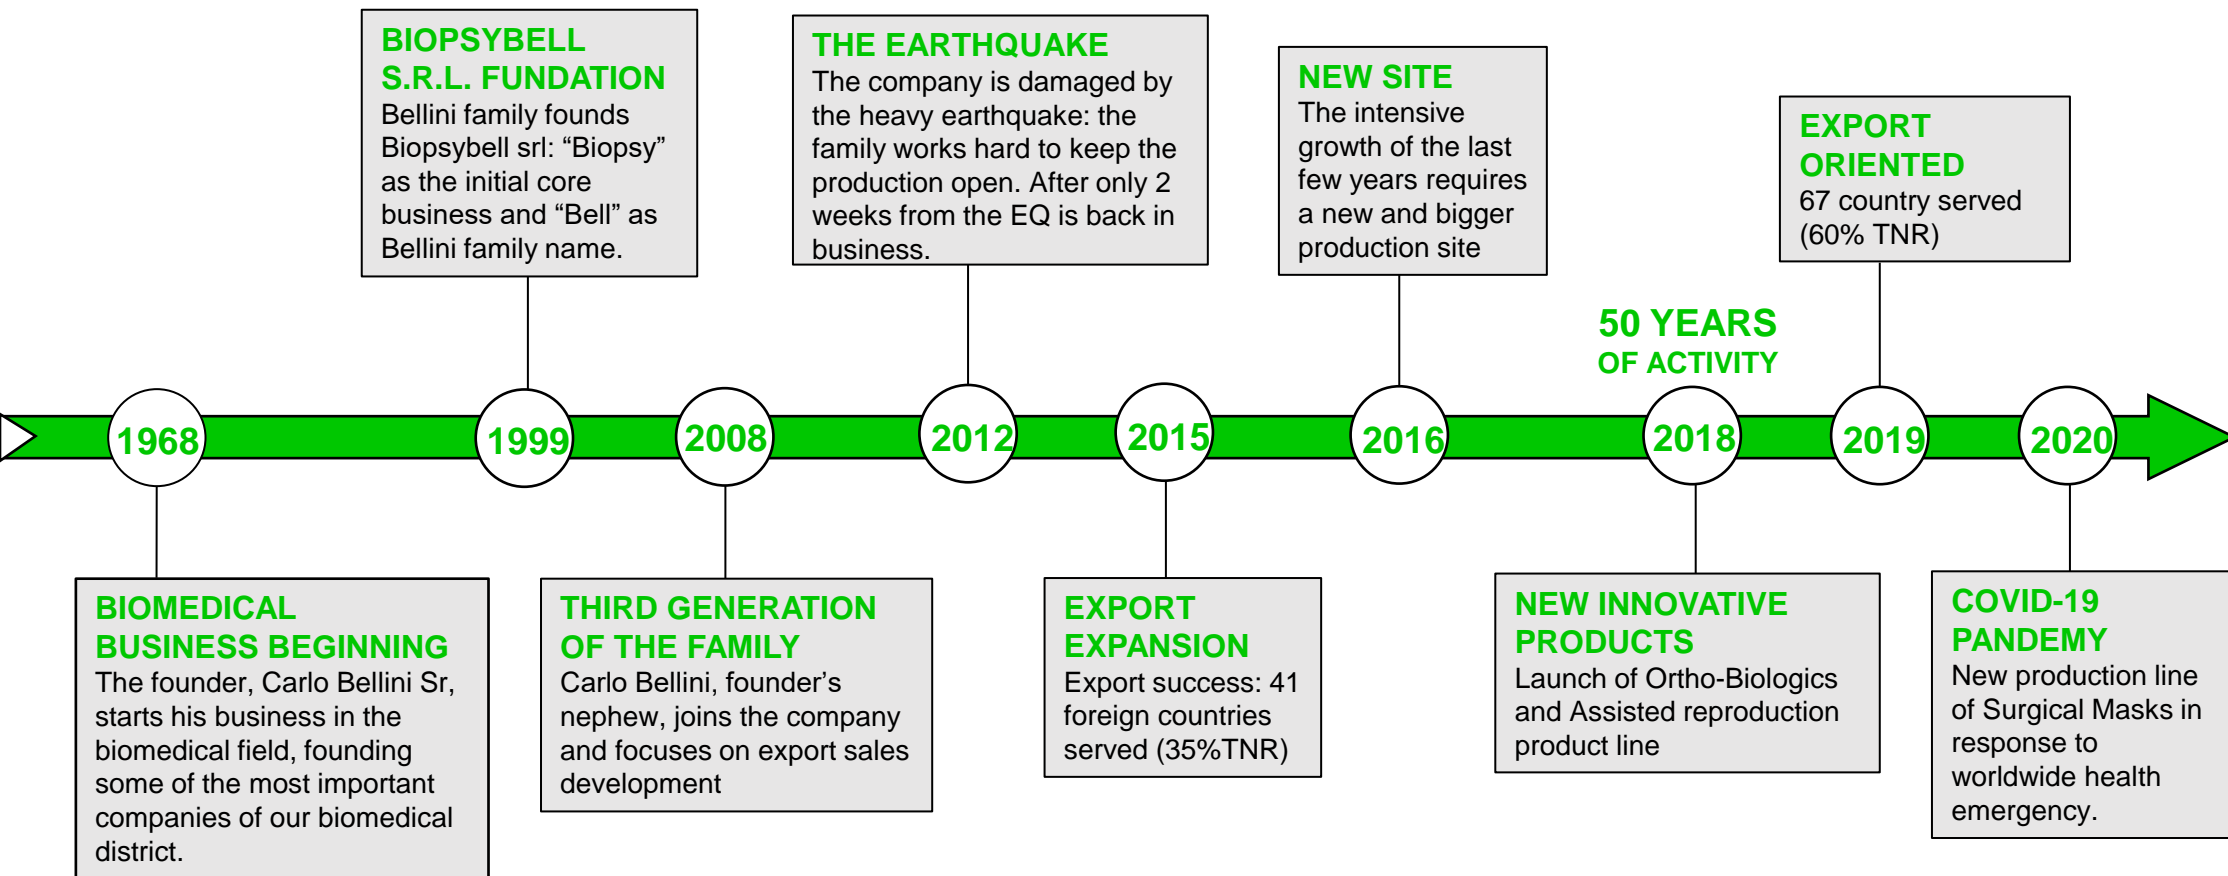

**OF EXPERIENCE  
IN THE BIOMEDICAL  
SECTOR**

# ABOUT US

The philosophy of BPB MEDICA™ is to grow alongside the needs of patients, doctors and hospital staff in general.

The Bellini family has been operating in the biomedical sector for three generations, for over 50 years.

The founder, Carlo Bellini, started the business in 1968 and passed ethics, integrity and a spirit of sacrifice down to his heirs. Today BPB MEDICA™ continues to manufacture all its components and devices within the company, with sales being made through our collaborator-salespeople in Italy and the rest of the world.

production machinery

**ENTIRE IN-HOUSE**  
production process

# OUR SERVICES

## **PRODUCTION PROCESS CONTROL**

Complete manufacturing process carried out internally (from the design to the final packaging) with state-of-the-art production machinery and equipment.

## **RESEARCH & DEVELOPMENT**

We conduct constant research in order to increase production and quality standards and develop new products. With an internal R&D team we can offer to our customers full support to meet their needs.

## **OEM SERVICES**

Being a manufacturing company, we can offer **OEM and Private label services** for companies who wants products under their brand name or with their custom colour.

## **MARKETING SUPPORT**

We provide to our customers video tutorial and surgical video procedure, case report, literature, presence at the major medical congresses, organization of events, laboratory training and courses.

## **REGULATORY & QUALITY DEPARTMENTS**

Our primary aim is product quality and provide painstaking service to the clientele. Our regulatory and quality teams conduct rigorous tests for this purpose, from the raw materials to the equipment and the finished product.

## **FOUR WEEKS DELIVERY**

Thanks to the control of the production process, we satisfy our customers orders within 4 weeks (on average)
